**Dear Colleagues,**

The 2026 Society for Free Radical Research Europe (SFRR-E) conference hosted by SFRR-E will be held from June 3-5, 2026 in Mainz, Germany, at the Johannes Gutenberg University campus, positioned in the center of Europe, nearby Frankfurt airport and in the heart of the German wine area. The Roman name of Mainz „Mogontiacum“ and one of the largest domes in Germany reflect the vital history of the city.

The 2026 SFRR-E conference will bring together scientists from different disciplines and regions from Europe and abroad to enjoy and discuss topics of redox biology in the context of environmental exposures and lifestyle risk factors.

International experts and conference attendees will find a historic venue, a city with picturesque old town district, hospitality and scenic Rhine shores. In addition to peer reviewed symposia and competitive selective oral sessions, we are excited to share special sessions dedicated to young researchers and early bird activities and a 2-day pre-meeting workshop and symposium.

We extend a warm invitation to you, your accompanying guests and sponsors from across the world to the SFRR-E Conference in Mainz 2026. The lovely Rhine-Main area will provide a perfect frame for an enjoyable and successful meeting.

We are looking forward to welcoming you in Mainz 2026,

Yours,  
Andreas Daiber and Tilman Grune

Conference venue: Old refectory  
University Campus, Johannes Gutenberg University Mainz
